

### Automated Sliding Gates

If you have limited space for swing gates, do not worry as Lincoln Metalcraft can offer you automated gates but in a sliding motion. This enables you to have automated gates at your property with minimal invasion onto your drive. All our electric gates can be fitted with sensors so they stop functioning if something causes an obstruction. This minimizes the risk of injury to people or pets and can save on costly car repair bills. They offer convenience and ensures that you leave your property knowing that the gates will close automatically saving you to get out of your car to close the gates
